We'll also want the Sample ID (for example, the locational info would be taken for this sample)
 Location Desc: Outside Ambient Air ~ 15.5 feet north of northeast corner of residence
 Sample ID: AA-1
 Location ID: PR #2

Yes, thanks.
 They mentioned NAD83 – Indiana specific.
 What is the property ID?
 I'll send them your email and see if we're all on the same page.

Looking at the Sampling Locations Data Elements table in Appendix B, there are only 6 required elements, so that would work if the Amphenol contractor can collect those elements for all sampling locations:

Sampling Location ID (Property ID)
 Location Description (text)
 Longitude (decimal degrees -XX.XXXXXXX)
 Latitude (decimal degrees XX.XXXXXXX)
 GPS_Collection_Date (MMDDYYYY)
 GPS_Collected_By (Name)

I would also add Datum (NAD83, WGS84, State Plane, etc.)

Does that sound reasonable?

Lucy

Hi –
 I thought what you needed were lat/longs of each sample point to make the figures (in Excel, with the data, etc). Looking at the table in App B, some of this seems related to the SCRIBE data base and unnecessary to what we need, but I'm new to this so I may be mistaken.
 Can we simplify the requirements, that is, boil them down to what you need for the figures and eliminate the database-specific info?
 Carolyn

Hi Carolyn,

I discussed the data requirements with Greg Rudloff and here's what we decided:

Please send the attached Region 5 Data Management Plan and have them collect sampling locations using the schema outlined in Appendix B (Sampling Locations Data Elements table).

All data collected should be shared with US EPA in Excel files (or ESRI File Geodatabase format when available) and should be accompanied by metadata compliant with the Federal Geographic Data Committee (FGDC) Content Standard for Digital Geospatial Metadata and its EPA profile, the EPA Geospatial Metadata Technical Specification. An add-on metadata editor for ESRI software, the EPA Metadata Editor (EME), complies with these FGDC and EPA metadata requirements and is available at <https://edg.epa.gov/EME/>. Consult <https://www.epa.gov/geospatial/geospatial-policies-and-standards> for any further available guidance.

Let me know if you have any questions.

Hi Lucy,
Any info to pass along?
Thanks.
Carolyn

Carolyn

Good afternoon. It is my understanding that the surveyors have started their work at the site today and should have it completed this week. Have you been able to confirm exactly how your GIS staff need the lat/long data presented to them? I need to get this information to the surveyors right away to ensure the data being collected will be useful for everyone involved.

Thanks

Sincerely,
